READING

(10 Marks)

Q1: Read the text and answer the following questions:

Mariam was sitting on her bed. She didn't feel very well, so her mum took her to see the doctor. 'Please can you tell us what we should do?' they asked. The doctor looked at Mariam and took her temperature. Mariam got a prescription for some medicine, which was called Penicillin. She started taking the pills and soon she was feeling better. She was curious about the medicine that she had taken, so when she went back to school, she asked her science teacher about it.

'Excuse me, Miss Alrammal, ' she said. 'Could you tell me who discovered Penicillin? Do you know if it's a new medicine?' Miss Alrammal replied, 'Penicillin is a type of antibiotics and it was first discovered by Alexander Fleming in 1929. But it was Dorothy Hodgkin who found out more about it in 1945. Why don't you do some research about her and you can do a short presentation in next week's lesson?' 'I'd love to!' said Mariam, delighted.

The day of the presentation arrived and Mariam felt a bit nervous. She took her time as she stood up. **She** relaxed and began her talk.

'Today, I'd like to talk to you about an important English scientist, Dorothy Hodgkin. She was born in 1910 and she always loved science. She studied Chemistry at Oxford University and then later

worked there. She did a lot of research and carried out experiments in an X-ray laboratory in Oxford. She made many important discoveries and found out a lot about Penicillin and Vitamin B12. She won the Nobel Prize in 1964. Do you know why I wanted to do my presentation? Two weeks ago I felt really ill and now I feel better!

1. Why did Mariam go to the doctor?
2. What medicine did the doctor give Mariam?

3. Who did Mariam ask about the medicine?
4. Who discovered Penicillin?
5. Who found out more about Penicillin later?
6. Miss Alrammal asks Mariam to do research and a short presentation
T/F
7. Was Mariam nervous before her presentation?
8. What prize did Dorothy Hodgkin win?
9. What does the underlined pronoun refer to:
10. Find in the text: (1) An adjective: (.....) (2) A verb in the past simple
tense (.....) (3) A preposition: (.....) (4) A word that means “a
medicine that kills bacteria in a body” (A.....)

WRITING

(5 Marks)

Q5 A: My grandmother likes baking cakes **as much as** I like eating them.

Q5 B: Amer isn't friendly, **whereas** his brother is very nice.

Q5 C: Suggested Answer

123 Future Street, Amman, Jordan

02 May 2025

Dear Grandchildren,

I hope you are reading this letter many years from now and that you are happy and healthy. Life in 2025 is fast, busy, and full of amazing technology. Most people have smartphones, and we use computers, tablets, and the internet for everything—studying, working, shopping, and even talking to our loved ones. Cars are becoming electric, and some countries are even testing flying taxis!

In this time capsule, I've included a few special items. A photo of our family using a laptop—because we use technology every day. An old mobile phone.

A newspaper from today—to show you what was happening in the world.

A small piece of a school uniform—so you know what I used to wear to school or work.

Some printed photos—because one day, you might not see these anymore!

I hope these things help you understand what life was like for us and how much we cared about the future—**your future.**

Love from,

[Your Name]
