امتحان الشهر الثاني

Q1: Read the text carefully and then answer the questions that follow.

Text A

Geologists, who study Earth's rocks and how they formed, can 'read' layers of rock.

These layers provide a record of what happened in the past.

In warm periods of Earth's history, there were many plants and animals which eventually died and were fossilised in layers of rock.

1-What do the layers of rock provide?

2-According to the text, what happened to the plants and animals in warm periods?

3- From the text, find out a word that means "being shaped and preserved in rock"

4- What does the underlined word refer to?

Text B

Areas where there is less than twenty-five centimetres of rain each year have desert climates. North Africa and central Australia are examples. During the day it is very hot, but at night it becomes very cold. In India and South-East Asia, there is a monsoon climate, so the weather changes suddenly.

Months of heavy rain follow months of dry weather. Places where there is a tropical climate are near the Equator. It is always hot and wet in these areas, and rainforests grow there.

1- How an area is described to have a desert climate?

.....

2- From the text, find out two regions that have a desert climate and write them down.

.....

3- How is the weather like during the day and the night in the desert climate?

.....

4- It has been mentioned that the weather changes suddenly, in which climate does this happen?

.....

5- What happens in the tropical climate?

.....

Q2: Fill in the blanks with the correct words from the box:

Temperate absorbs atmosphere drought survived extinction

- 1- The people's nature prefers the _____ climate rather than the desert one.
- 2- When it rains, the ground _____ the water comes from the rainfall.
- 3- People who hunt animals could lead to the _____ of many species.
- 4- _____ happens when no or little rain falls on a certain area.
- 5- Earth has _____ many natural disasters during several ages.
